

20

SIMPLE
WRITING HACKS
TO TAKE YOUR
MESSAGING FROM

GOOD → **GREAT**

Scientifically improve
your messaging.

DIFFERENCE BETWEEN GOOD vs GREAT MESSAGING

All major brands have messaging that is

80% GOOD

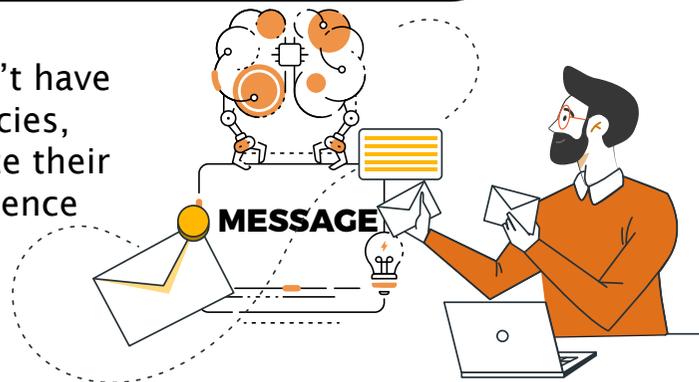

Only some have messaging that is **100% GREAT**

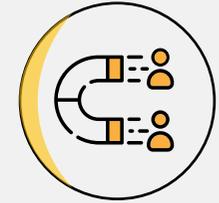

THE DIFFERENCE?

Winning brands don't have better creative agencies, but they DO optimize their messaging using science and algorithms.

Your messages can be more **EFFECTIVE** if they are **OPTIMIZED** using science and algorithms.

Whether your messaging is trying to:

Drive Customer Acquisition

Increase Market Share

Change Customer Behaviors

100%

vs

80%

=

In messaging, this difference can be worth **\$100s of millions** in revenue!

BARRIERS TO TAKING YOUR MESSAGING FROM GOOD to GREAT

OPINION, NOT SCIENCE

Message improvement is largely based on opinion and scientific techniques are rarely used to improve messages.

TOO MANY COOKS

When it comes to messaging, its hard to get all stakeholders to agree.

MLR DELAYS

Not having options to review with MLR team leads to costly delays.

CUMBERSOME AND TEDIOUS

The mind-numbing message improvement process causes managers to lose patience and give up.

WORKSHOP FATIGUE

Endless workshops and message review sessions are tiring and often don't even lead to better messages.

RACE AGAINST TIME

There is no time to "perfect" messages when you are scrambling to meet timelines.

SUBJECTIVE ASSESSMENT

There is no objective way to rank multiple versions of a message without research.

JUST NOT WORTH THE EFFORT!

So, is it even possible to make your marketing copy **CRISP, ENGAGING, AND COMPELLING?**

WORRY NOT!

Newristics has put together an illustrative list of hacks (with examples) that you can use to "crush it" in your next campaign!

HACK #1

START WITH A NUMBER

You can make a message more powerful by starting it with a “power” number. It attracts attention and can quickly communicate a specific benefit/claim to entice followers to click to read more. Your English teacher may not be happy about you starting a sentence with a number, but your customers may find it engaging.

Message 1 *Before hack*

At each measured timepoint, from 1.5 to 13 hours post dose, patients see consistent efficacy with Product X.

Message 1 *After hack*

1.5 hours is all it takes for Product X to start showing results in patients, results that consistently last for up to **13 hours**.

Message 2 *Before hack*

Disease Y still prevails. 1 in 23 adults in the US suffers from the disorder.

Message 2 *After hack*

4 or more! For every 100 adults you meet, 4 or more will likely have Disease Y.

**HALVE
IT!**

Just focus on cutting the number of words in the original message by half. Ruthlessly get rid of every word that is not essential to the existence of the message. When in doubt, delete it.

**Message 1
Before hack**

You can't see Disease Y but it is everywhere. It's highly contagious - one wrong touch, one person who sneezed or coughed, and you can contract it.

**Message 1
After hack**

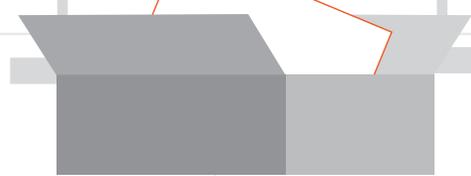

Disease Y is highly contagious - one single touch, cough or sneeze can be fatal.

**Message 2
Before hack**

Disease Y is a 24-hour problem. Prescribe the 24-hour solution - once daily Product X.

**Message 2
After hack**

One dose of Product X = 24 hour protection from Disease Y.

HACK # 3

WRITE IN METAPHORS

A Metaphor is a psychological as well as literary technique to help create understanding. For a writer, it is a way of using language to manipulate the way the reader responds.

**Message 1
Before hack**

Get rid of your heartburn fast and easily with Product X. Be **FREE** again.

**Message 1
After hack**

Product X is **your fireman** for heartburn.

**Message 2
After hack**

“Don’t fall into a **trapdoor** of embarrassment. Get a financial advisor today.

**Message 2
Before hack**

“All we need is guidance in our finances, but we don’t share our worries for fear of looking silly.

**FEEL
IT!**

The key to capturing attention is tapping into your readers' emotions. Content that appeals to your audience's senses will help them resonate with your writing and keep them interested.

**Message 1
Before hack**

These real people tried Product X and achieved their weight loss goals. Wouldn't you like to join them?

**Message 1
After hack**

Remember that **feeling** of looking at a fit person with no extra weight? Product X can help you become one of them.

**Message 2
Before hack**

Lose more and save when you bring in a friend.

**Message 2
Before hack**

Feel the excitement of losing more and saving more. Just bring in a friend.

SYNONYMIIZE KEYWORDS

Don't get stuck using the same circle of words you know. Try something new for a change! Use a tool like Visual Thesaurus to discover new synonyms that you may not think of on your own.

Message 1 Before hack

Let patients' pain relief and tolerability guide you when titrating Product X.

Message 2 Before hack

New sequencing saves time, money, and gets them to goal faster.

SYNONYMS

Message 1 After hack

Titration Product X can be easy. Simply follow the patients' threshold for pain.

Message 2 After hack

New sequencing is cheaper and faster in getting patients to goal.

HACK # 6

BREAK IT INTO FRAGMENTS

Lengthy sentences won't make you look smarter. In fact, they do quite the opposite. By cutting your words short, you make it easier for readers to digest your content and encourage them to keep reading.

Message 1 *Before hack*

Product X lets you enjoy food with no regrets.

Message 1 *After hack*

Enjoy the food.
No regrets.
Product X.

Message 2 *After hack*

Citrates are irritants.
Product Y eliminated them.

Message 2 *Before hack*

Since citrates are known irritants, Product Y got rid of them.

HACK # 7

LEVERAGE ATTENTION GRABBING HEADLINES

Your headline is often the first, and sometimes the only chance to get your target customer's attention, and if you want your writing to get noticed, it's time to start creating headlines that your readers just cannot ignore.

Message 1 *Before hack*

Product X offers proven efficacy to treat your patients' manic highs and depressive lows.

Message 1 *After hack*

There is now a product to treat patients' manic highs and depressive lows.

Message 2 *Before hack*

Once-daily treatment for the acute treatment of both poles to help get patients on the path to stabilization.

Message 2 *After hack*

A path to stabilization for patients of both poles in acute treatment.

HACK # 8

CHANGE THE TONALITY

Tone makes a statement and either breathes life into it - or sucks the life out of it. A great tone can inspire desirable emotional responses in your audience. And emotional responses are huge in human decision-making.

Message 1 *Before hack*

The Extended Release of Product X is proven effective in treating the highs and lows of Bipolar Disorder.

Message 1 *After hack*

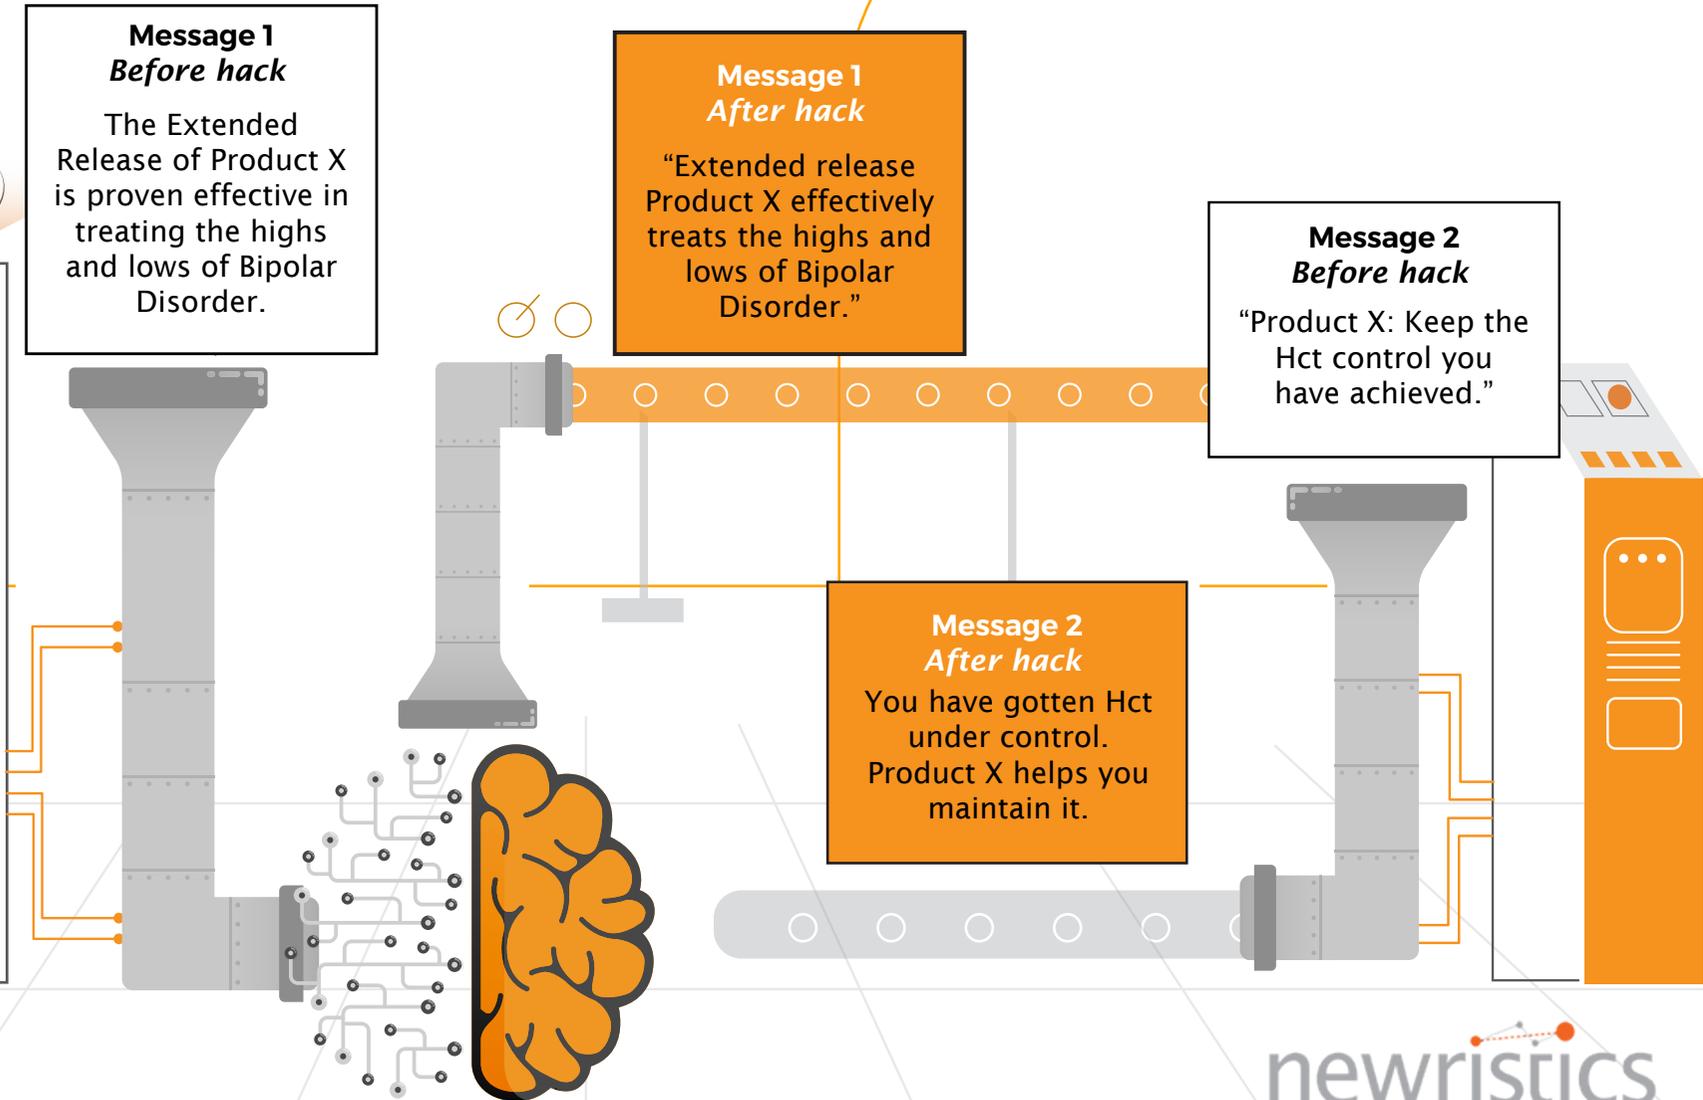

“Extended release Product X effectively treats the highs and lows of Bipolar Disorder.”

Message 2 *Before hack*

“Product X: Keep the Hct control you have achieved.”

Message 2 *After hack*

You have gotten Hct under control. Product X helps you maintain it.

**START
WITH A
BANG!**

The use exclamation points, especially at the start of your copy can bring a touch of excitement or emotion to your writing. This addition when used sparingly adds an element of emphasis or surprise to keep the reader engaged.

**Message 1
Before hack**
No need for needles. One single pill helps you achieve your X goals in just 24 weeks.

**Message 1
After hack**
No need for needles anymore!
One single pill helps you achieve your X goals in just 6 months.

**Message 2
Before hack**
Product X yields weight loss of more than 2 kg, an additional benefit besides its powerful management of glucose levels.

**Message 2
After hack**
Product X yields weight loss of more than 2 kgs! This is an additional benefit besides its powerful management of glucose levels.

HACK # 10

WRITE A RHETORICAL QUESTION

Asking a question in the first line of a paragraph grabs readers' attention and sets up your point. Presenting a message in the form of a question also makes it seem less salesy!

Message 1 *Before hack*

Heart Failure is the fourth most common reason for hospital stays in the US.

Message 1 *After hack*

Did you know that Heart Failure is the #4 cause of hospital stays in the US?

Message 2 *Before hack*

Don't lose control of your life to fibromyalgia pain.

Message 2 *After hack*

Why let fibromyalgia pain control your life?

HACK # 11

SET UP THE CUSTOMER'S WISH

Your writing should make your audience imagine an ideal world scenario - one that promises to address their painpoints. Setting up the audience with what they are going to gain will help keep their attention on your product.

Message 1 *Before hack*

With Product X, diabetes medicine without serious side effects is no more a distant dream.

Message 1 *After hack*

What if treating diabetes without serious side effects was possible? With Product X, it can be.

Message 2 *After hack*

What if your meals were perfectly portioned already, so you could just enjoy the food and not count calories? Wish granted!

Message 2 *Before hack*

Portion Control: Your only job is eating. We do the counting for you.

HACK # 12

THE HIGH FIVE

The first few words are the highlight of your pitch so make them count. Let people know what the core message and your offer is within the five words. If your core message and promise is hidden half way down the paragraph, it will likely be missed.

Message 1 *Before hack*

Product X is not only effective, it's also sleek and discreet in design.

Message 2 *Before hack*

Zero copay every month for qualifying patients. Now that's a difference.

Message 1 *After hack*

Qualities that matter: sleek, functional, and discreet...Product X has it all.

Message 2 *After hack*

Access is our priority. Most patients qualify for \$0 copay every month.

HACK # 13

USE THE WORD "BECAUSE"

Using the word "because" is a magical way to get people to do things! Usage of "because" and then following it up with a reason, results in significantly more compliance.

**Message 1
Before hack**
PRODUCT X allows for affordable support to be available for patients who are privately insured.

B
E
C
A
U
S
E

**Message 1
After hack**
Because Product X provides affordable support to privately insured patients, they will not be left out.

**Message 2
After hack**
"You don't have to worry about needles anymore because only one Product X pill helps you control blood sugar for 24 hours."

**Message 2
Before hack**
One pill a day, put the needles away. With Product X, you can finally control your blood sugar for 24 hours with just a single pill.

B
E
C
A
U
S
E

HACK # 14

CHANGE THE UNITS

Swapping units of measurement to your advantage can significantly dial up the persuasion quotient of a message. You could say the exact same thing by switching years for months, feet for inches, and so on. This small change can often cause a big change in perception for the reader.

Message 1 *Before hack*

No need for needles.
One single pill per day
can help you achieve
your A1C goals in just
24 weeks.

Message 1 *After hack*

No need for needles.
One single pill per day
can help you achieve
your A1C
goals in as little as 6
months.

cm pt lb mm
g m
ft kg km

Message 2 *Before hack*

Product X yields weight
loss of more than **2 kg**,
an additional benefit
besides its powerful
management of
glucose levels.

Message 2 *After hack*

Product X yields weight
loss of more than **4.4
pounds**, an additional
benefit besides its
powerful management
of glucose levels.

AVOID
NEGATIVE
WORDS

Replace negative words with positive alternatives. Some words have negative connotations and you want to steer clear of those when referencing your product. Pick the right words and your copy is memorable and persuasive. Choose the wrong ones and you lose your reader's attention or worse still - turn them off your product.

Message 1
Before hack

Product X focuses on comfort. You won't have to call your doctor to get rid of your **injection** discomfort anymore.

Message 2
Before hack

Product X focuses on your comfort. You won't have to call your doctor to get rid of dosing discomfort anymore.

DELETE
NEGATIVE

Message 1
After hack

For patients **losing** motivation in managing their diabetes and weight.

Message 2
After hack

For patients who need more motivation in managing their diabetes and weight.

EVOKE A FOLLOW-UP QUESTION

As a writer your aim is to keep people glued to your copy.
You want them to read one line, then the next and then the next. Asking a question can build suspense and using suspense is preying on this human desire for closure. This is why building suspense can be such an effective tactic for writers.

**Message 1
Before hack**

Titration X to patients' needs is the best way to start.

**Message 1
After hack**

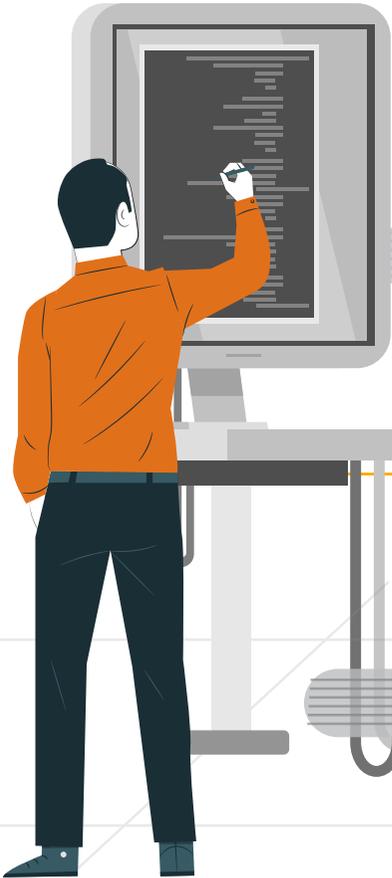

First best step?
Titration X to patients' needs.

**Message 2
Before hack**

Product X is well tolerated in most patients with T2D.

**Message 2
After hack**

We now have a product that is well tolerated in most patients with T2D. Product X.

INCLUDE A
**2-WORD
PARADOX**

A short paradox can be an effective tool in your writing toolkit. It forces the reader to think, to consider, to work things out for themselves. It can also be a very effective tool to highlight the absurdity of what characters are doing or saying.

Message 1
Before hack

No more saying "No" to your family and friends because of heartburn. Product X.

Message 1
After hack

No more **minor crises** resulting from heartburn at family gatherings. Use Product X.

Message 2
Before hack

Betterment - the next generation investment advice made easier.

Message 2
After hack

If you are **clearly confused** by all the financial jargon, it's time for Betterment.

HACK # 18

COMPARE
ONE
OBJECT TO
ANOTHER
(SIMILE)

Make use of similes in your writing. A simile makes the writing more interesting and lyrical. Similes spark your reader's imagination while getting the information across. They help the reader 'see' the scene in their heads.

Message 1 *Before hack*

Don't settle for slower healing when PRODUCT X can cut treatment duration in half for Disease Y patients.

Message 2 *Before hack*

Asthma patients may be experiencing more symptoms than you realize.

Message 1 *After hack*

Come out of the gates strong with Product X. Treat your Disease Y patients in half the time.

Message 2 *After hack*

Asthma symptoms may be like the tip of an iceberg. Patients may not be reporting many symptoms.

HACK # 19

BEGIN WITH THE WORDS WITH THE SAME CONSONANT SOUND
(ALLITERATION)

Smart writers use alliterations to make their words stick. Alliterations can add a poetic richness to writing, which most readers appreciate when used skillfully. Engaging writing should flow well and alliterations can help or hinder this depending on how well and in context they are used.

Message 1 *Before hack*

Completely eradicating hepatitis C isn't too big a goal for Merck. We will strive until we succeed.

Message 1 *After hack*

"Effective eradication of hepatitis C isn't an **enormous** goal for Merck. We will strive until we succeed."

Message 2 *Before hack*

Making your goals come true with Discover student loans.

Message 2 *After hack*

With **Discover** student loans, you can **dare** to make your **dreams** come true.

ALLITERATION

**COMBINE
TWO
MESSAGES**

Combining sentences can help improve the overall quality of your writing. The process encourages interesting word choices and transition words.

**Message 1
Before hack**

Product X can be taken on an empty stomach, at any time of the day.

Product X offers the flexibility to be taken in a 5mg or 10mg dosage.

**Message 2
Before hack**

Product X takes the sugar out and brings weight down.

Product X removes excess glucose via the kidney.

**Message 1
After hack**

Experience the flexibility of Product X. Choose either 5mg or 10mg dosage and take it at any time of the day.

**Message 2
After hack**

Bring your sugar and weight down by removing excess glucose via the kidney.
